Touch-Screen technology is captivating, non-invasive sales and service for retail shoppers. For retail vendors touch-screen technology is the silent salesperson that provides insight into each customer's area of interest and on-the-spot print outs of their immediate needs – giving your sales representatives the information they need to close the deal. Capta-Vision touch-screen technology can track product sales, purchasing trends, marketing campaigns – and even function as an in store directory. Move your message forward with Capta-Vision.

Capta Vision is a division of Xpression Media Group • 740 West 1700 South Ste.5 • Salt Lake City, Utah 84104
