

# Dynamic Digital Signage Make your Message Move

- **Animated images engage your audience**
- **Easily make changes and updates**
- **Go Green with paperless signage**

Dynamic Digital Signage (DDS) is the strategic placement of flat screen LCD and plasma television monitors for out-of-home message delivery and signage display. Capta-Vision DDS systems replace static paper print with animated imagery. Our DDS systems engage your audience by incorporating motion graphics, video and sound with a powerful network that is programmable to any demographic!

**Move your message forward with capta-vision**

The new marketing platform

Move your message

Engaging content draws eyes in.
