

Capta-Vision Presents

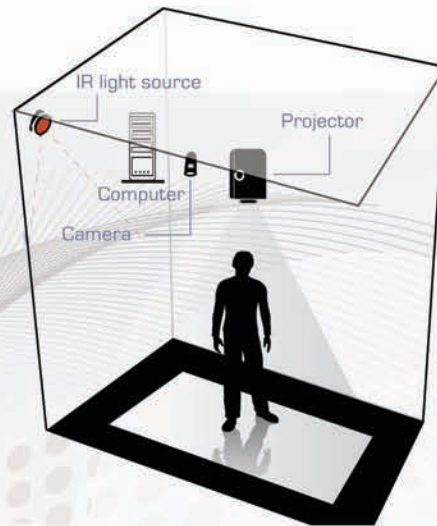

immersion
immerse yourself in magic

INTERACTIVE FLOOR PROJECTION SYSTEMS

MAKE YOUR MESSAGE MOVE.

IMMERSE YOUR AUDIENCE IN MAGIC

BY MERGING ADVANCE PROJECTION TECHNOLOGY WITH MARKETING AND EDUCATION -
WE PUT YOUR MAGIC IN MOTION.

HOW IT WORKS

Immersion interactive projection uses special motion sensors, a projector and a computer. The motion sensors inform the computer when and where people walk over your projected image. As your audience interacts with Immersion, it responds by moving dynamically layered imagery in coordination with sound effects. The result is a fully immersive interactive experience your visitors will never forget.

MARKETING IN MOTION

Finally - a device that creates a permanent impression and an engaging customer experience! Immersion uses the power of physical interaction to carry your message directly to the customer.

EFFECTS

Sample effects for Immersion
These and many more available for
use to enhance your Immersion.
